

REGULATION ON ACCOMMODATION

This regulation regulates tourist accommodation in hotels and other accommodation in Central Asia and Tajikistan in accordance with (1) generally recognized standards and (2) local conditions.

The generally recognized standards of accommodation (room categories, room area, room equipment, service and service requirements, etc.), which most tourists and sector entities are guided by, are as follows:

I. TYPES AND CLASSIFICATIONS OF HOTELS

(No unified international classification exists today. The World Tourism Organization in 1989 approved hotel standards, but they are of a recommendatory nature and are not mandatory)

1. **Hotel-1*** - a few rooms, minimal amenities and level of service. The room has a bed, bedside table, chair, closet or coat rack, mirror. Toilet and bathroom (shower) - on the floor (shared). Guests are provided with 2 towels. Rooms are cleaned daily, bed change - once a week.
2. **Hotel-2*** - several rooms, minimal amenities and level of service. In the room there is a bed, bedside table, chair, closet or hanger, mirror. The room has a toilet and a bathroom (shower). Guests are provided with 2 towels. Rooms are cleaned daily, bed change - once a week.
3. **Hotel-3*** - good amenities and level of service. Presence in the room refrigerator, TV, telephone, dressing table, separate bathroom with shower or bath. It is possible to have an air conditioner and a mini-bar. Guests are offered breakfast, which can be included in the bill or provided on request for an additional fee. Rooms are cleaned and towels are changed every day, bed linen is changed 2 times a week.
4. **Hotel-4*** - excellent facilities and level of service. The rooms are spacious, you can choose rooms of different categories. The rooms necessarily have a TV, refrigerator, air conditioning, mini-bar, small safe, bathrobe, slippers, telephone with the ability to call other cities. A separate bathroom, complete with toiletries - soap, shampoo, shower gel, hair dryer. Linen and towels are updated daily. It is possible to order dry cleaning, laundry, ironing of clothes for an additional fee. It is also possible to have a movie theater, sauna, conference hall, restaurants, sports facilities, entertainment venues, possible rental of cars, motorcycles, bicycles, sports equipment.
5. **Hotel-5*** - the highest comfort and level of service. Rooms are spacious, often multi-roomed, with luxurious furnishings. The bathroom is equipped with lying bath (jacuzzi) and shower cabin, a set of quality cosmetics, terry bathrobe and slippers. Room cleaning and linen change is made every day. The room has everything you need for a comfortable stay. The hotel offers a network of restaurants of classical and national cuisines, stores, hairdressers

and laundries, saunas, beauty salons, gyms, swimming pools, entertainment facilities.

6. Classification of hotels by stardom still does not guarantee rigid standards. One and the same set of stars may imply different level of service in different countries. For example, with the same number of stars hotels in Eastern Europe offer more services, and cost less than in Western Europe. American 3* hotels are close to 4* hotels in Europe. And in Asia a 3* hotel will not always have TV, refrigerator or mini-bar.
7. **In Central Asia, including Tajikistan, where 93% of the area is mountains, hotels do not always meet the classification requirements. For example, in a large part of hotels rooms are decorated with two single beds (size 80x190), but this does not mean that the room must necessarily have two people. That is, there are few hotels that have a single double bed size 160x190 or 200x200. But, still, when choosing an SGL room, rooms (with two single beds) are presented to only one person.**
8. The affiliation of a hotel with a well-known hotel brand adds stars and is reflected in the price. These are usually hotels with four or five stars.
9. There are also hotels without stars, which does not make them bad. To get stars it is necessary to pass certification, which evaluates not only the level of service, services, room equipment, but also the building itself, its location, so not everyone can successfully pass the procedure. Nevertheless, in such a hotel you can get a decent level of service for a small amount of money.
10. **Hostel** - inexpensive hotel with a small set of services (without amenities in the room), a multi-bedded room with a large number of beds and a shared bathroom.
11. **Guesthouse** - guesthouses are two or three-story buildings with 20-30 rooms, homey atmosphere and few staff. As a rule, in the house, in addition to tourists, lives and the entire family of the owner of the hotel. This type of accommodation is not subject to any classification and rarely complies with all the rules of sanitary and epidemiological norms.
12. **Hotel Garni** - a hotel without a restaurant (even without breakfast).
13. **Tourist Class** - hotels of strictly boarding type. They are recommended for guests with very modest requirements for comfort and service. All minimum amenities are available in the rooms.
14. **Deluxe** - hotels of this class are very similar to Superior Deluxe hotels, but with the difference that they are not so huge and their prices are more reasonable.
15. **HV1** - club system hotel of the first category with accommodation in cottages. Approximately corresponds to a four or five star hotel.
16. **HV2** - a club hotel of a lower second category. Approximately corresponds to a three-star hotel.

II. Room category "Standard" (Standart)

1. Standard furniture

2. Bedroom with a comfortable bed
3. Bathroom (with toilet, sometimes separately)
4. Minimum set of services (TV, air conditioning and Internet).
